Ocean Monitoring and Inspection Center

Monitoring (Inspection) Report

OUC (Testing) No. HDJC2011-004

Client: Headway Technology Co., Ltd.

Project Name: Shipboard Testing of OceanGuard™ Ballast Water
Management System

Inspection Dept.: Marine Chemistry Analysis and Detection Laboratory

Approved by: 宋文

Date of issue: 10/21/2011

Inspected by.: Ocean Monitoring and Inspection Center,

Ocean University of China

(Official Seal)

STATEMENT

1. The report is invalid without the official seal of Ocean Monitoring and Inspection Center, Ocean University of China (hereinafter referred to as the Center).
2. Copy of the report is invalid without the original seal of the Center.
3. The report is invalid without signature of test operator, verifier, and authorizer.
4. The report is invalid with any alteration.
5. Should any dissidence arisen on the Test Report, please contact the Center within thirty days after receiving the report. An overdue submission of any complains will be disregarded.
6. If the samples were sent to the Center by the client, the Center is only responsible for the testing results, but not for the source of the samples,.
7. Test results are valid only for the same batch of samples.
8. Copy of test reports is not allowed without written permission of the Center.
9. This report is in decuplicate, with five for English version and five for Chinese version. For each version, two original copies and one duplicate will be sent to the Client, two duplicates will be kept at the Center and the inspection department (laboratory) respectively for documentation.

To improve our testing capability and service quality continuously and to better serve clients and the community, comments from all sectors of the community to the Center are warmly welcome.

Project Description

Entrusted by Headway Technology Co., Ltd., the project comprises tests on physical, chemical and biological parameters of ballast water treated by OceanGuardTM Ballast Water Management System installed on SITC YOKOHAMA, and gas parameters of air in ballast tanks during ballasting and deballasting process. Ocean Monitoring and Inspection Center, Ocean University of China acts as the implementation party of the project, and accredited staffs of the Center were appointed to the test sites to supervise the operation of the whole process and to carry out sampling and on-site inspection as required. Off-site testing samples were delivered to specified laboratories of the Center and tested by accredited staffs within a specified time region. The test was carried out during period of 12th Sep 2011 to 20th Sep 2011.
